

Internship 2.0 – Bridge to Industry

100 Days. Real Engineering.

A structured, industry-aligned program designed to transform diploma students into capable engineers — ready to contribute from day one.

CHATAKE INNOWORKS PVT. LTD.

Made with GAMMA

The Reality After Diploma

Most diploma graduates face a critical crossroads — with theory in hand but no clear path to real engineering roles.

Industry vs. Engineering

Unclear distinction between academic knowledge and what employers actually expect.

Lack of Real Skills

Classroom learning rarely translates directly to production-level capability.

No Practical Exposure

Without hands-on experience, students struggle to clear interviews and internships.

The Gap — What's Missing?

What Students Have

- Textbook theory and concepts
- Basic coding exposure
- Academic project experience
- Minimal industry context

What Industry Needs

- Real system deployment skills
- Problem-solving under constraints
- Working knowledge of tools and platforms
- Ability to build, test, and ship

Chatake Innworks Pvt. Ltd.

The Solution: Internship 2.0

A structured 100-day program that bridges the gap between diploma education and industry readiness — through real AI learning, system-level skills, and practical deployment.

Real AI Learning

Hands-on with machine learning models, not just theory.

Industry-Level Skills

Tools, workflows, and practices used by professional engineering teams.

Practical System Building

Build, deploy, and present real projects — not assignments.

Chatake Innworks Pvt. Ltd.

Core Learning Areas

Advanced AI & Machine Learning

Build and train real ML models using industry frameworks.

MLOps & Deployment

Learn to take models from notebook to production environment.

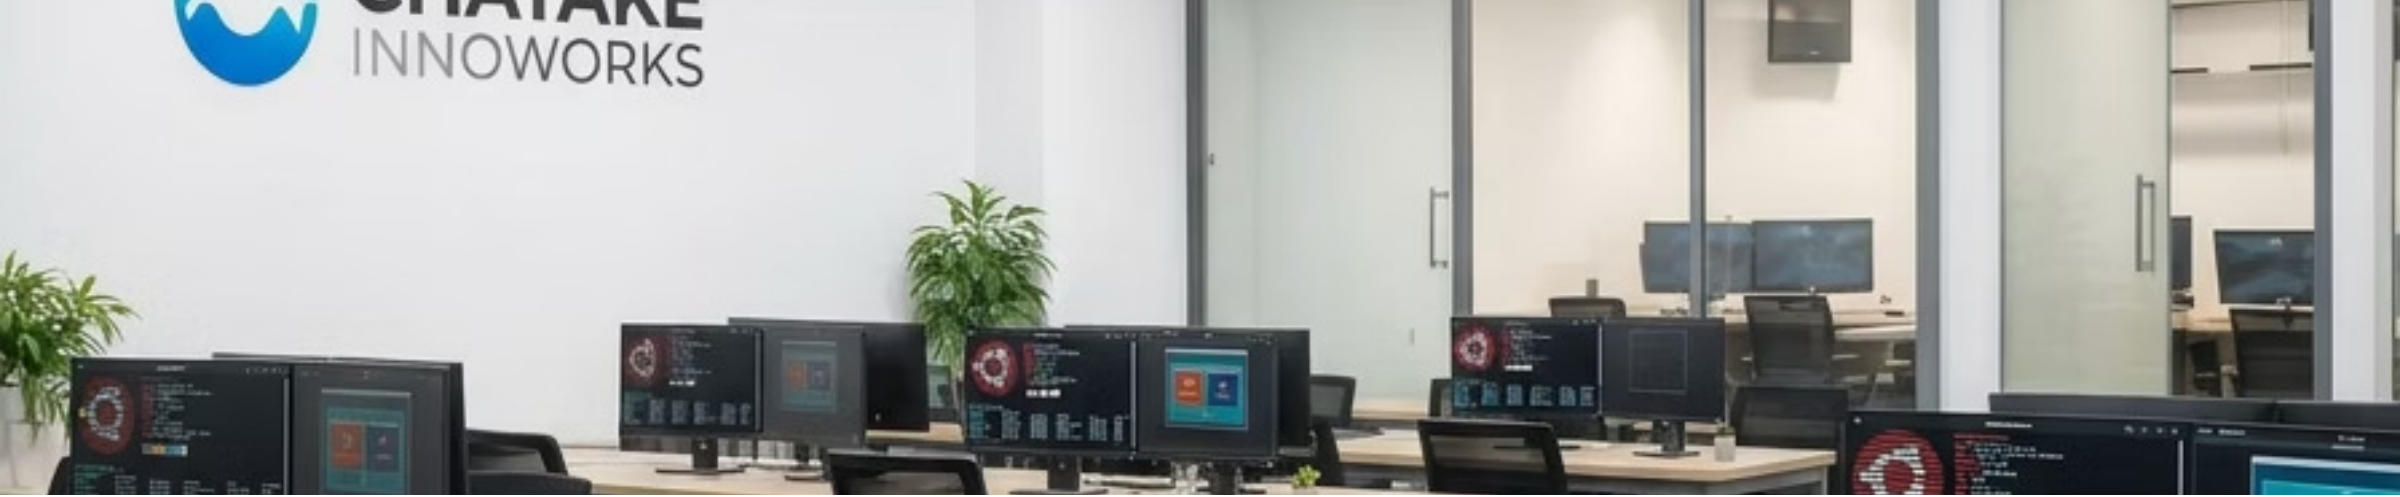

Cloud Computing (Azure / SaaS)

Hands-on experience with enterprise cloud platforms.

Advanced Python & Big Data

Deep Python skills combined with data analytics pipelines.

System-Level Skills

Real engineering happens in real environments. You will work directly with the tools and systems that professional teams use every day.

Linux (Ubuntu)

Command-line fluency, system administration, and environment configuration.

Docker & VMs

Containerization and virtualization for reproducible, scalable deployments.

Real Environment Setup

Configure, troubleshoot, and maintain actual working systems — not simulations.

What You Will Build

Your 100-Day Output

By the end of the program, every student will have a tangible, demonstrable body of work.

→ **Real-world AI projects** — built, tested, and documented

→ **Deployable systems** — live projects, not just presentations

→ **GitHub portfolio** — a public profile that speaks for your skills

→ **Industry-ready profile** — resume, projects, and confidence

Beyond Learning — The Full Ecosystem

Internship 2.0 is more than a training program. It is a launchpad for your long-term engineering career.

Engineering Guidance

Personalized direction for BE/B.Tech pathways and higher education decisions.

Career Direction

Understand where the industry is headed and how to position yourself.

Technical Confidence

Build the mindset and communication skills that set engineers apart.

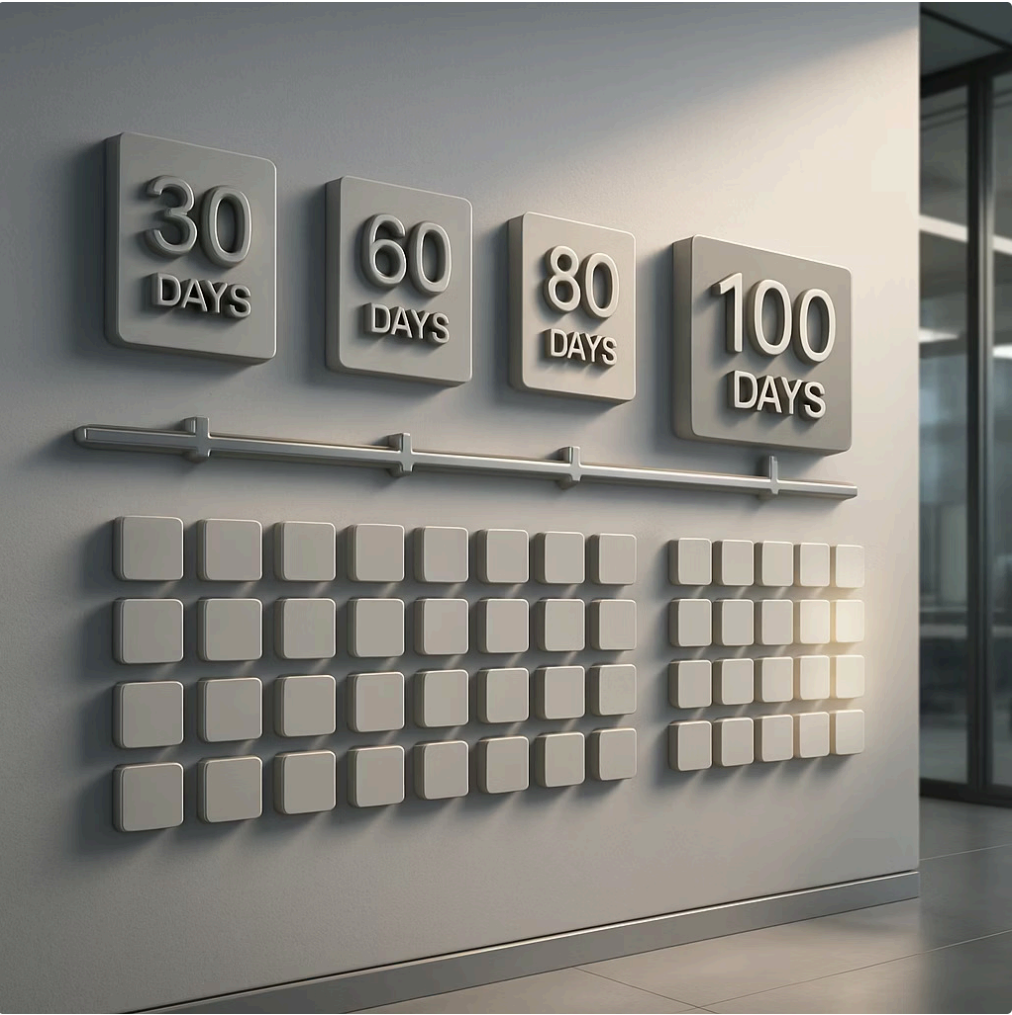

Long-Term Ecosystem

Stay connected to Chatake Innworks' network of mentors, projects, and opportunities.

Chatake Innworks Pvt. Ltd.

Program Details

Structured, intensive, and selective — designed for focused growth with close mentorship.

Duration

25 May – 15 September

Program Length

100 Days, Structured & Intensive

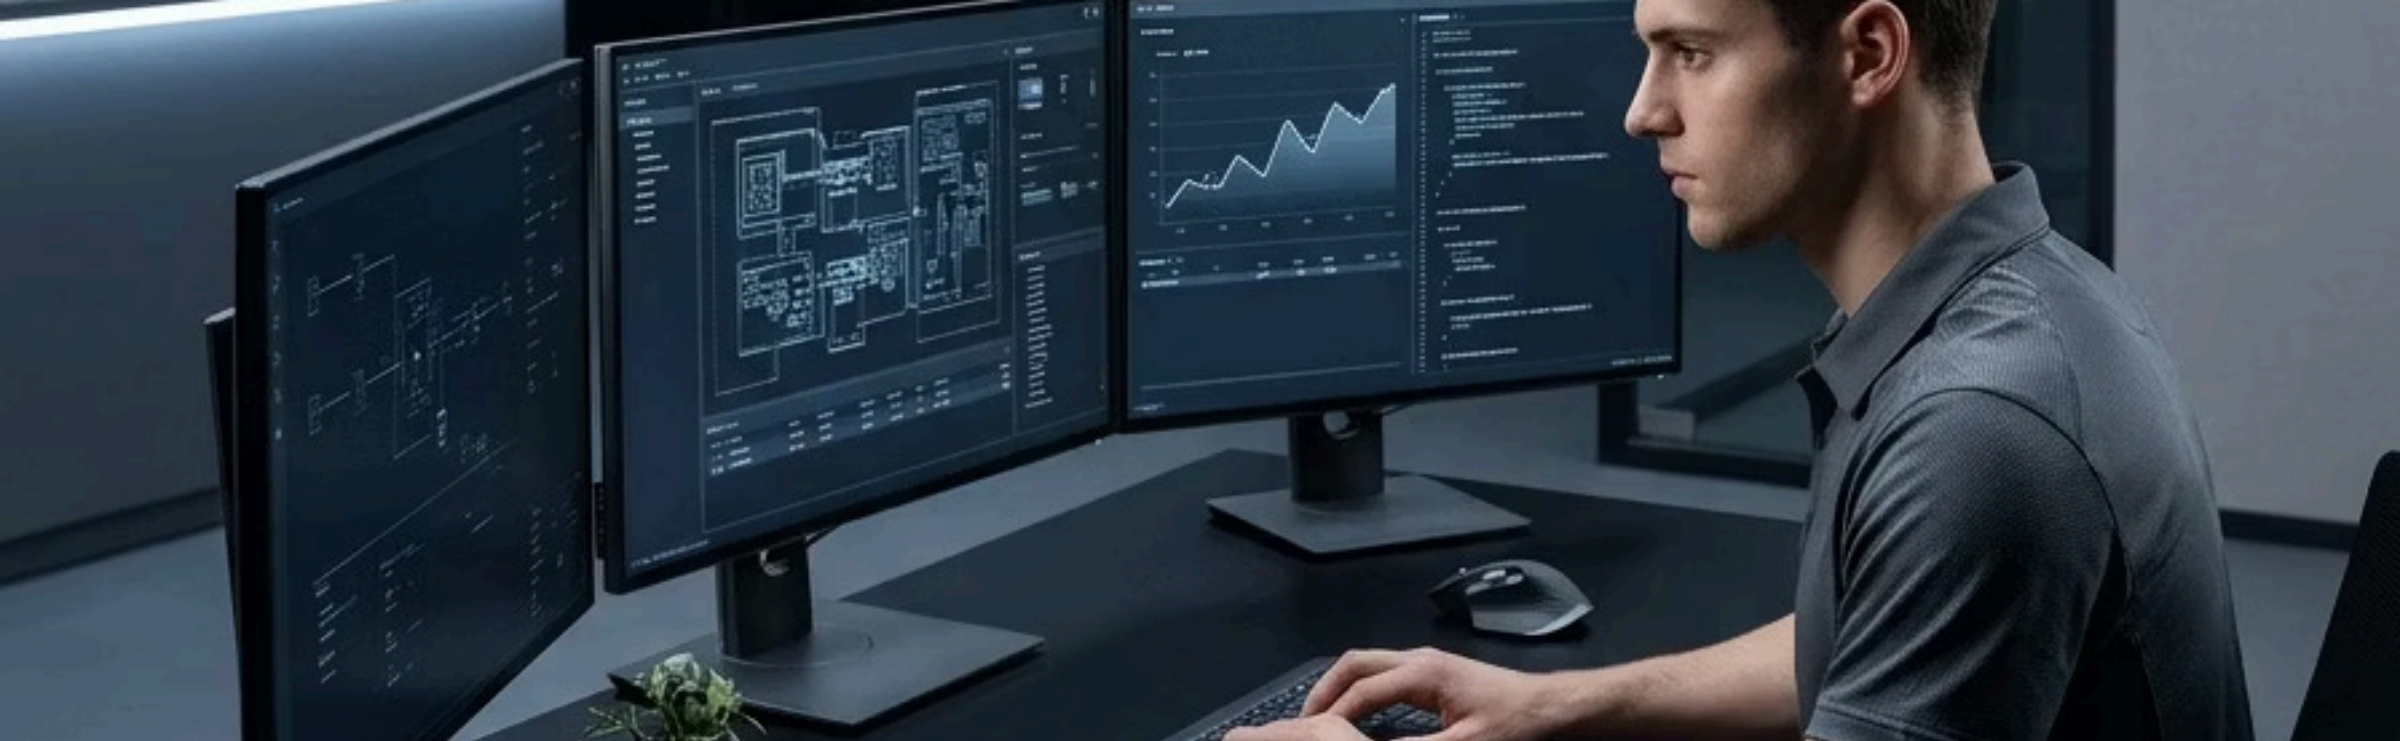

Batch Size

Limited to 40 Students

Admission

Selection-Based — Not First-Come

 Small batch size ensures personalized mentorship and maximum hands-on time for every student.

This Is Not for Everyone.

Internship 2.0 is designed for students who are serious about building real skills, going beyond the basics, and taking ownership of their future.

Build Real Skills

Not certificates — capability that employers recognize.

Go Beyond Basics

Push past textbook learning into real engineering.

Create Your Future

100 days that can change your career trajectory.
